SUMMARY

Performance-driven and motivated Full-Stack Web Developer with 2 years of extensive experience in web design and web development. Adept to achieve extraordinary results. Possess a strong attention to detail, well-developed time management skills, and ability to complete all projects within schedule and in a timely manner.

WORK EXPERIENCE

(Jun. 2019 – Present)
Junior Software Engineer, Workspace Infotech Limited, Dhaka Bangladesh

- Developed a web application, "WebSMS", for marketing brands. Bootstrap was used to develop the front end which includes chat, sending whatsapp and normal messages and variety of advanced features. The backend, built using Laravel and MySQL. Besides, to work the app at best, it depends on SDK that build using Node, Express, and Mongo, which provides to send single, bulk, schedule messages to whatsapp numbers and so on functionalities.

- Developed a web application, "Hubex", for looking individual process under organization. The backend, built using Node, Express, Mongo, and MySQL, takes advantage of well- developed RESTful API, and user authentication with JWT.

- Developed a web application, "Webinar" using ReactJS and Socket.io that allows users to chat in real time during live video.

- Developed a full-stack web application, "KUAI", using ReactJS that allows users to order foods and so much more. Redux was used to manage state. All data (users, restaurants & miscellaneous) are stored on a backend created using Node and MongoDB.

- Developed a full-stack web application, "tu identidad", using ReactJS that allows users to be a part of an organization and submit various aspects of data such as certificate, address, contact information, stock table for shareholders, etc. Redux was used to manage state. User's all submitted data and progress is stored on a backend created using Node and MongoDB. In addition, there is a chatting feature which allows users to ask for any kind of query.

(Jan. 2019 – Jun. 2019)
Full-Stack Web Developer (Contractual), Door Soft, Dhaka Bangladesh

- Established an already existing website "bdSat" from SAAS to Standalone with contribution of developing new features and fixing existing features' bug, for collecting ISP & Cable TV bills. Bootstrap and jQuery were used to build the front-end. Customers' package, bill and so on data are stored on a back-end using Laravel & MySQL.

- Developed an online platform, "Angel Doctor" for Doctors and Patients. Patients can take consultancies and doctors will consult the patients and so more. Bootstrap and jQuery were used to build the front-end. Patients' consultancies and Doctors consultancies' report, payment and so on data are stored on a back- end using Laravel & MySQL.

- Developed a website, "Ask Me POS" that allows Restaurant owners to be a part and grow their food business service. Users can order foods from their desired restaurants and so more. Bootstrap and jQuery was used to build the front-end. Restaurants, Suppliers, Users and so on data are stored on a back-end using Laravel & MySQL.
